

Kalang Falls Wet		
#	M	Notes
Approach		Follow Kalang Falls path to river, cross to RL before left bend, cross to RR after same bend, scramble down once, cross river. High water, stay high RL, cut corner, abseil down from tree. Look for bolts RL.
1	25	RL
2	48	RL
3	42	RL
Short walk past cascades		Traverse out RL, scramble down, rejoin river, cross to RR, scramble down, go into river
4	15	RR downstream side of big boulder
5	29	RR, 60m rope is good
6	10	RL, follow flow to find next anchor
7	34	RR, up high. Be very careful of the sharps on the rocks 1-2m from the anchor where the rope rubs. Bolt at bottom RR to set up bottom releasable.
8	28	RL downstream side of boulder
9	8	RL up high
10	25	RL
		Follow riverbed rightside to edge then look for anchor at left
11	25	RR under tree
12	55	RR at spillover. Emergency bolts about 20m down RL (abseiler's right)
13	22	RR backward walk
14	32	RL down the chute up high (tallest person first). High water access anchor single bolt RL before the chute

Kalang Falls Dry		
#	M	Notes
0	15	RR Handline if required
1	38	RR From tree
2	40	bolts at edge to right
3	27	RL Traverse out left, then down. White tree, on edge, very loose approach
4	45	RL Bolt or Tree
5	12	RL
6	18	RL
7	29	RL Large Tree
8	26	RL Bolts Next to Big Waterfall
9	27	RL Bolts on Block, exposed
10	40	RL Tree
